Övergripande uppdragsbeskrivning

We are now looking for a Business Analyst with experience within Finance Industry to our customer. □

Description working tasks: □

Our responsibility lies within the business requirements process: □

- analyzing and writing requirements related to how we operate the exchange and clearinghouse products and functionalities, □
- ensuring that the Acceptance Testing related to each requirement is accepted and approved □
- support operational teams □
- configuration of our technical solution and financial products □
- handling of production related issues □

The team acts as a second line support for the operational teams, helping them analyze issues and questions, understanding the business impact and identify mitigating actions, and we have a system ownership for our trading and clearing platforms, as well as some of its surrounding systems. □

When our business units requests new functionalities or products, we will participate and produce requirements related to how we will operate this implementation. We then assure the quality of the function via the role of 'streamlead', where you'll be assigned implementations within a upgrade project. In this role you'll work with coordination between testers, developers and project managers, to track, prioritize and plan for corrections found for this implementation, as well as handling any questions that may arise within the upgrading project. □

About the team, role and responsibilities

- Drive and/or participate in projects related to new business- or technical initiatives focusing on derivatives trading, clearing and settlement.
- Formulate requirements for Market Operations and act as liaison towards software development
- Streamlead new functionalities during the in Acceptance Testing, as part of upgrade projects
- Translates moderately complex customer business requirements (e.g., more complex features and solutions)
- Provide senior support to the market operations teams
- Participating in analysis and resolutions of unresolved production issues

The Customer strive to challenge the status quo and always look for new ways to improve and exceed the collective goals of their teams', company and clients. A strong inner drive and adaptability is therefore essential to succeed. Additional skills and requirements we ask for:

- Proven ability to deliver good results in implementations projects (including planning, execution and analysis)
- Very good understanding of the Nordic financial products, trading and/or clearing. For example from experience working with back, middle or front offices, or supporting organizations
- Experience working technical solution for financial products. with Genium Inet (trading clearing platform) is an advantage, but experience from other complex technical solution (example trading or back office fronts ends) can be equally valued
- Experience from working with trading/clearing protocols such as FIX or ITCH is an advantage
- Good communicator who likes to share knowledge and support colleagues
- Structured and well organized
- Good analytic skills and is used to writing business requirements
- Excellent language skills in written and spoken Swedish and English
