Övergripande uppdragsbeskrivning

We are now looking for a Java developer to our customer. □

Description Working tasks: □

You and the team will be focusing on programming large, distributed systems with high availability. The Customer is a small, but diverse, group of talented Java developers. Their high availability, mission-critical software runs in customer data centers around the world. □

If you have a strong Object-Oriented and core Java foundation, are detail-oriented, methodical, take pride in your work, and enjoy investigating new technologies, this job is right for you! □

What you will be doing? □

- Designing, developing, modifying, adapting and implementing short- and long-term solutions to information technology needs through new and existing applications, systems architecture, network systems and applications infrastructure. □
- Developing and implementing security solutions for complex assignments with quality. □
- Modifying existing internal software products to add to new functions, adapt to new hardware, improve performance or enhance product usability. □
- Mentoring others in the team on implementing system improvements, challenging the team to increase efficiency wherever possible and utilizing current industry trends. □
- Participating in IT systems strategy, development and /or integration services to clients. □
- Taking part in the architectural and infrastructural design of our applications □

Technologies that we work with:□

• Spring framework, Java 8+, REST, Maven, TeamCity, React, Typescript, npm□

Skallkrav

Bachelor's degree in Computer Science or other related fields or equivalent work experience

Relevant experience within software development, at least 8-10 years

Extensive experience of Java, with a minimum of 5-6 years

Substantial experience of Java 8+

Experience in working in distributed teams over several time zones

Experience from the financial industry and high performance and high volume systems

Fluent in English, both written and spoken.

Börkrav

A full stack profile, experience with web development and modern frontend frameworks such as in particular React/Typescript

Experience in the risk field within finance

Experience with latency optimization and performance debugging

A TDD mindset

Experience with building CI/CD pipelines

Övriga krav

Offert för detta uppdrag måste skickas in via KeySourcingTool. Svar via mail kommer att få begränsad feedback

Om konsulten anlitas för uppdrag hos kunden kommer en bakgrundskontroll att genomföras (bl.a. utdrag från belastningsregistret) vilket konsulten härmed godkänner.

CV måste vara på engelska. Bifogas i Wordformat under fliken Dokument.

Personliga egenskaper

Excellent communication skills together paired with a strong client service mindset

The ability to quickly learn new systems

A strong inner drive, you should thrive in supporting high demanding users in a fast-paced environment

Övrig information
