Övergripande uppdragsbeskrivning

We are now looking for a Requirements analyst / Quality Assurance with AWS-experience to our customer.□

Description Working tasks:□

This role is for an AWS cloud project, the ability for requirement analysis & testing. AWS skills are a must.□

We are looking for an experienced, structured and committed consultant, with extensive experience as a business analyst and experience also from testing. With this position, you will join the project to migrate an extensive datawarehousing solution with downstream Business Intelligence and reporting systems to AWS.□

Senior Business Analyst□

- Gathering requirements from Stakeholders (Business & Tech), through workshops etc.□
- Writing requirements for the project (functional, non-functional, SLA...), and presenting them to stakeholders□
- Define the project scope together with PM.□
- Define processes for approvals and sign-off decisions and deviations□
- Impact analysis on design□
- Writing Detailed Product Descriptions, specifications and possibly detailed Functional Description□
- Write and describe Acceptance Criteria, driving Definition of Done sessions together with team□
- Handover documentation from project to IT Operations and maintenance□
- Define KPI´s□

Quality Assurance / Test Lead

- Define the QA process and aligning it with an agile approach
- Adapting project to Nasdaq QA Strategy and compliance, as well as product lifecycle –project framework
- Create and support the development of Use cases and test cases
- Requirements coverage and deviation reporting
- Plan Tests and Test Cycle, Create Test Metrics, Execute Tests for sourcing, data quality and reporting
- Support Release process in Jira
- Documentation in Confluence

□ Tools: Atlassian, Jira, Confluence

□ Framework: PM Methodologies, Agile framework (preferably SaFe 5.0)

□ Technologies: Big Data analysis, Data warehousing, Cloud services & Deployment preferably Amazon Web Services (Infrastructure and related applications and components), Database (SQL and Redshift)

The team:

With this position, you will join the project to migrate an extensive datawarehousing solution with downstream Business Intelligence and reporting systems to AWS. The project's technical product owner is the Technology sub-team of the Nordic Economic and Statistical research team. The ESR team provides the Nordic & Baltic region with reporting and analytical support for all of the Customer's business units. This is achieved by providing Business Intelligence systems for self-service analysis, reporting of recurring statistics and bespoke research services for ad-hoc questions, all to help improve trading, capital formation and market structure.

The ESR team is the amalgamation of three teams: Technology, Research and Statistics, that are jointly responsible both for the technical infrastructure and for providing business insights from prudent management of trading data from European Markets.

Skallkrav

Experience of requirements analysis

A solid understanding of SQL databases and ETL processes

Experience from Capital Markets and Finance & Banking incl. related products

Some programming skills, e.g. Python, SQL & Cloud (AWS)

Fluent in English, both written and spoken
